**motor-bipolar stepper:EM-258 aka 17PM-K212-PIT aka STP-42D144 Minebea - Astrosyn Shinano Kenshi Stepper with metal gear**

This is the equivalent to Astrosyn SST-024 with a 10 Ohm coil. These were pulled from an Epson printer assembly. The high holding torque and small package size makes it ideal for small CNC or robotics project RepRap. It includes a metal gear

Manufacturer page: Minebea - Astrosyn Shinano Kenshi

#### Specifications

Nominal Voltage	7
Current	0.7
Resistance (Ohms)	10
Torque (in-oz)	44.4
Torque (kg*cm)	3.2
Wires	4
Condition	pulled
Steps / Revolution	200
Made in	China
weight	175 grams
Step Size (degrees)	1.8
NEMA frame size	17

**\$8.39 USD**
